Appendix A TEAM OR INDIVIDUAL STUDENT – CLIENT FEEDBACK

Name of Client and organisation: Sonnar Interactive Limited

Name of Student/s:

Thank you for acting as client for this Research and Development Project. Now that the project is nearing completion we would like some feedback that will assist the team or students in their future development. It is important that we gain feedback about the aspects of the work that were done well and also suggestions for improvement. Please comment the team as a whole and where it is possible the individual students.

This feedback will be used by the assessors to complete a picture of the student's performance during the project, and by the students to reflect on their performance during the project and in assessing their future development needs.

Please email the completed feedback to the project supervisor.

THE PROJECT

Could you please comment on the results of the project? To what extent did the student/s achieve the agreed outcomes?

Project goal is to develop an Alexa Skill "Animal Farm" for kids with visual impairements. Students have shown big progress in Alexa Skill development, I was presented with a working prototype and it looks like the project is close to completion.

How well did they go about completing this work?

Finalised the prototype, now working towards project submission for certification to Alexa Store.

What suggestions do you have for improvement?

N/A

How did the student/s contribute added value or provide professional expertise to your organisation?

N/A

In what ways did the student/s show initiative in learning about the wider aspects of IT professional practice?

Students had to lear from scratch about development of Alexa Skills. They were very self-reliant in the process.

PEOPLE SKILLS

In what ways did the student/s adapt to the situation and develop and maintain professional working relationships appropriate to your organisation?

Team was very well organized - good organization of meetings and scheduling.

In what ways did the student resolve conflicts and manage and deliver to the sponsor's expectations?

I was not aware of any conflicts.

OVERALL SKILLS

How did the students' skills and abilities develop during the project?

I hope they learned about concepts of Voice Application development and Alexa Skills development.

What advice would you offer this team or each of these students for their professional development?

To consider seriously working in the Voice Technologies space - it is the fastest growing technology at the moment.
